FIN-Tech – a Growing Sector – How Can Gloucestershire Get Involved

Fin-Tech is a fast-growing sector. There are questions around the future of cash, challenger banks, transparency of transactions and the opportunities offered by banking that is fully integrated with digital capability. Gloucestershire has a thriving and growing Tech capability, so how can we grow that to Embrace Fin-Tech? A panel of Tech businesses look at the opportunities and how Gloucestershire Businesses can get involved in the FIN-Tech sector.

Richard Holling

An experienced business executive with 30 years of business and financial services experience. Richard has worked as a consultant, sales executive and manager for several major international companies. In 2018 he changed focus and started to work with start-ups and SMEs. In 2019 he formed Berkshire Dales, which offers SMEs advice on getting the right business finance, and other consulting services. With his background in banking and digital banking solutions, Richard is close to the FIN-Tech sector and take a keen interest in its development.
